

Odoo exercise / Ux report

- 1 Pay attention to the hover state color. The user may be confused if he doesn't clearly see a change while hovering. I would add also a slight background change to add clarity. (same for nav)
- 2 The border color lacks contrast with the background.
- 3 The disabled button should have an "interdiction" mouse while overing.
- 4 The tabs (nav and items) should be accessible with the keyboard arrows.
